

Discover, monitor, manage, and secure SaaS apps

Eliminate shadow IT with Auvik
SaaS Management

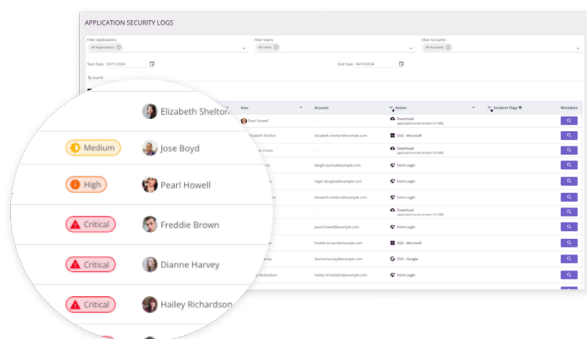

Powerful & automated discovery

Discover and automate the documentation of your entire desktop, business, and SaaS applications inventory. Our powerful solution works in the background, requiring no additional effort or document.

Access & account inventory management

Understand where risks come into play across the entire app stack. Be alerted and stay up-to-date on compliance risks in your business, such as employees sharing accounts or using service accounts.

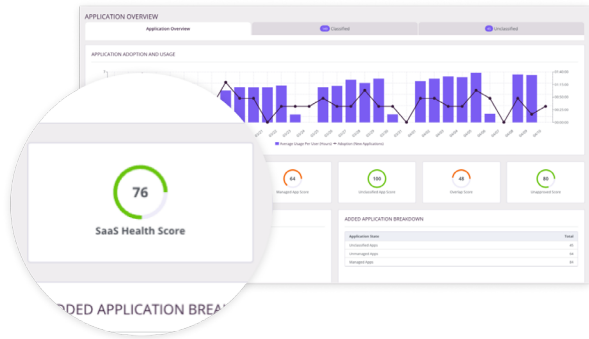

Understand risky shadow IT

Quickly spot what applications employees are adopting in the shadows that are putting your critical business data at risk.

SaaS health scorecard

Understand where to begin with your SaaS health score.

Beautiful & powerful reports

Reports across the entire SaaS stack, such as: compliance & discovery report, employee off-board checklists, license review, and quarterly business review on shadow IT adoption.

Streamlined employee offboarding

Prepare a checklist of all the applications the employee used in their role. Share reports internally & externally to empower HR, IT, and business leaders with the information they need to properly offboard an employee.

Your full inventory in 30-minutes

Out-of-the-box installers for the most common RMM and endpoints tools allow for rapid deployment of our technology for an instant inventory.

Free support

What our customers say about Auvik SaaS Management:

“Understanding what is in use within an organization would otherwise be a mostly manual process... The big return for us is the creation of efficiencies without our service delivery team.”

John Fitzryk, Braden Business Systems

“It's an integral part of waht we want to do with our clients. Employees often do the wrong thing, and they'll continue to do the wrong things unless you can have a big bright flashlight on those things.”

Dean Mechlowitz, TEKRISQ

“We primarily use Auvik for three things: shadow IT monitoring, SaaS license management, and SaaS compliance, i.e., to ensure people aren't using tools they shouldn't be using.”

Doug Miller, Brightworks Group
